

CHAPTER 3 - TOOLS, SPARES AND STOWAGE

1. This chapter is included as an amplification of the Complete Equipment Schedule (CES), and is intended to assist in the identification of the vehicle equipment.

2. This chapter is not intended to be used in place of the CES for tool checks, etc, as items which are permanently in position on the vehicle are not shown in the layouts of tools and spares.

3. The layouts of equipment will assist the crew to identify particular items in the CES. The stowage sketches have been omitted from this chapter, as it is not practical to illustrate the stowage arrangements owing to the diversity of vehicles and operational equipment required for the particular roles.

Layout No.1	...	Handtools and servicing equipment
Layout No.2	...	Miscellaneous equipment
Layout No.3	...	Miscellaneous equipment
Layout No.4	...	Vision and sighting equipment
Layout No.5	...	Tools, spares and equipment for MG .30 (Browning)
Layout No.6	...	Tools, spare and equipment for GPMG 7.62 mm
Layout No.7	...	Flotation struts and support bar
