Combat Vehicle Crewman Helmet System featuring Bose®

The new generation of Gentex Combat Vehicle Crewman (CVC) Helmet Systems is based on a long legacy of Gentex CVC Helmets, with improvements in shell design, inner liner and communications equipment, and features Bose communications technology. Designed for personnel operating and manning military armored and other tactical vehicles, the helmet shell is intended for missions that require ballistic, impact and noise protection, while allowing communication via intercom or radio attenuation.

### KEY FEATURES

- Designed for land and sea mounted operations where reliable communications and Active Noise Reduction (ANR) is critical.
- Comprised of three integrated components:
  1. Gentex shell available in three different ballistic resistant configurations (F1, F2, M9)
  2. Bose/Gentex Improved Inner Liner
  3. Bose Product Improved Combat Vehicle Crewman (PICVC) Communication Headset with Active Noise Reduction (ANR) and intercom interface cable assembly
- The CVC is compatible with a wide variety of vehicle intercom systems and/or radio systems through a standard line of interface cables
- Available in sizes Medium (M) and Large (L), and fits the 95th percentile of end users
